March 2014

How can I determine if the discoloration in my drinking water is a problem in my home or with the Town's system?

Is the water coming out of your tap yellow, brown or red? Here are some simple questions that may tell you whether the problem is on your end or not:

1. Is the water colored when you first turn on the tap in the morning or after not using it for awhile?
2. Does the water run clear after a few minutes?
3. Are only some of your taps affected?
4. Are you the only one in the neighborhood with the problem?
5. Is it only the hot water that is colored?

If you answered yes to any of the above questions, then the problem is probably with your plumbing. If you answered yes to the last question, the problem is probably with your water heater. In either case, you should call a plumber. If you answered no to the last 4 questions, then you should contact the Town of Bernalillo Public Works Department at 771-7124.

Do You Know?

Join us on an occasional series as we tour historical aspects of Bernalillo. In this series we will feature a historic aspect in a picture and ask you a question (or two) about it. The first person to answer correctly on our Facebook page will win a prize. Lets get started!
