On November 19th, 2015, The New Mexico Environment Department Drinking Water Bureau conducted a sanitary survey to assess the operating condition and adequacy of the Town of Bernalillo water system. They reported that no significant deficiencies were identified and no recommendations were provided. Further they found our water system to be a well maintained and well operated water system. Finally they found that the Town's operations and maintenance program includes preventative maintenance schedules that keep the water system in good standing.
