*When everyone works together, we can make the best use of our planet's natural resources. When you recycle the products you use every day, like cardboard boxes, milk jugs, and soda cans, you give new life to items that used to be thrown away, saving energy and helping lower greenhouse gas emissions in the process.*

## Recycling Tips & Information

### ALUMINUM

#### Aluminum Recycling Tips

Prepare aluminum cans for recycling by either crushing the cans to save space or leaving them uncrushed.

Cans that are rinsed out will have little or no odor and are less likely to attract bugs.

#### Did You Know?

Recycling aluminum takes 95% less energy than making aluminum from raw materials.

### CARDBOARD

#### Cardboard Recycling Tips

Prepare cardboard for recycling by removing all other materials in the box such as plastic wrap, polystyrene peanuts and other packing materials and breaking down cardboard boxes to save storage space.

Try to keep cardboard dry and free from food waste.

#### Did You Know?

Recycling one ton of cardboard saves over 9 cubic yards of landfill space.

### NEWSPAPERS

#### Newspaper Recycling Tips

Cardboard boxes, paper bags and other non-newsprint paper are considered contaminants and are not compatible with newspaper recycling.

It takes time to sort non-newsprint materials out at recovery facilities, so save them time and labor by not mixing non-newsprint items with your newsprint.

#### Did You Know?

10 million tons of newsprint is thrown away each year in the United States.

### PAPER

#### Paper Recycling Tips

Recyclable paper includes: Magazines and catalogs, telephone books, direct mail, brochures, pamphlets and booklets in addition to cereal, cake, chip and cracker boxes. Be sure to remove the liner and all food from the box, flatten the box and place flattened box in a paper sack with your junk mail, mixed paper, magazines and catalogs.

#### Did You Know?

The average American uses 650 lbs. of paper per year. Annually, each person in the United States uses paper equivalent to two pine trees.

### PLASTIC

#### Plastic Recycling Tips

Remove plastic tops from the plastic containers being recycled and rinse containers with water.

Crushing containers will help save space while storing them.

#### Did You Know?

Enough plastic bottles are thrown away each year to circle the earth four times.

Approximately 88% of the energy is saved by producing plastic from plastic as opposed to manufacturing plastic from the raw materials of oil and gas.

The number of plastics recycling businesses has nearly tripled over the past several years, with more than 1,700 businesses handling and reclaiming post-consumer plastics.

Approximately 80% of the U.S. population has access to some kind of plastics recycling program.

The Town of Bernalillo in conjunction with Albuquerque Recycling, Inc. and the Santa Ana Star Casino will conduct an Electronics Recycling Event on Saturday, September 17, 2011.

Electronics can be dropped off from 10 a.m. to 2 p.m. at the Santa Ana Star Casino located at Hwy. 550 and Jemez Dam Road in Bernalillo.

Albuquerque Recycling accepts computers, laptops, monitors, printers, copiers, cell phones, radios, stereos, televisions and more. For a complete list of accepted items, please visit <http://www.AlbuquerqueRecycling.net/Services.page>. Disposal fees apply only to televisions (\$10) and CRT monitors (\$5).
